

Get your rebate today!

Bright Energy Solutions® is a portfolio of rebate programs that can help your business use energy more wisely. Preapproval may be required. For detailed requirements, visit brightenergysolutions.com.

COMMERCIAL REFRIGERATION & FOOD SERVICE

- Commercial dishwashers (with electric water heat)
- Electric fryers, griddles, steamers, convection ovens, combi-ovens, hot-food holding cabinets
- Electronically commutated motors (ECMs) in various equipment
- Glass door reach-in cases replacing open multi-deck units
- Ice machines
- Kitchen hood controls
- LED reach-in refrigerated case lighting and occupancy sensors
- No-heat and low-heat reach-in doors
- Switched reluctance evaporator motors
- Strip curtains in refrigerated warehouses and walk-in coolers/freezers

COMPRESSED AIR

- Adding storage
- Compressed-air leak survey
- Cycling refrigerated dryers
- Dew-point demand controls
- Engineered compressed-air nozzles
- Low-pressure blowers
- Mist eliminators
- No-loss air drains
- Pressure flow controller
- Variable-frequency drive (VFD) compressors

CUSTOM INCENTIVE

- Incentives for energy-saving measures not covered by other Bright Energy Solutions programs. Preapproval is required.

ELECTRIC FORKLIFTS & TOW TRACTORS

- Class 1, Class 2, or Class 6 replacing internal combustion unit, or addition to fleet
- Forklift lithium-ion batteries

HEATING & COOLING

- Air-source heat pumps and mini-splits
- Central air, roof-top units, chillers
- Quality Install (small split system and ASHP)
- Demand-controlled ventilation
- ECM in exhaust fans or VAV boxes
- ECM on domestic hot water and cooling water circulators
- Energy-recovery ventilators
- Ground-source heat pumps
- Guest room energy management systems
- Heat-pump water heaters
- High-volume low-speed fans
- Packaged terminal units (PTAC and PTHP)
- Single package vertical A/C or heat pump
- Switched reluctance motors for HVAC supply fans
- VRF multi-split air-cooled heat pumps
- Window and wall air conditioners

INFRARED CURING & DRYING

- Preapproval is required.

LIGHTING (NEW CONSTRUCTION)

- LED high bays/low bays
- LED indoor grow lights
- LED recessed downlights
- LED troffers
- Lighting watts per square foot compared to code
- Occupancy sensors on LED refrigerated case lighting
- TLED linear lamps/u-tubes

LIGHTING (RETROFIT)

- Contractor incentive for lighting retrofit installations
- LED exit signs
- LED high bays/low bays
- LED indoor grow lights replacing HID
- LED pin-base lamps
- LED refrigerated case lighting and occupancy sensors
- LED recessed downlights
- LED troffers
- Lighting sensors and controls
- TLED linear lamps/u-tubes

NEW CONSTRUCTION DESIGN REVIEW

- No-cost design review, energy recommendations and potential custom rebates for new facilities. Contact your utility early in the design stage to qualify.

PUMPS & VFDs

- High-efficiency pumps
- Variable-frequency drives (VFDs)

Ask about our rebates **TODAY** to help you save money on lower energy costs **TOMORROW!**

We're Here **TO HELP!**

Bright Energy Solutions and your municipal electric utility offer these rebates to help your business. We understand that when our local businesses do better, we all do better. Take advantage of these incentives today!

- Save energy and money
- Operate more efficiently
- Increase productivity
- Help protect the environment

Get Your **REBATE**

1. Download a Bright Energy Solutions application at **brightenergysolutions.com** or call your local utility.
2. Submit completed applications to your utility or email them to: **rebate@brightenergysolutions.com**.

For More **INFORMATION**

Bright Energy Solutions programs are offered through your local municipal utility in partnership with its power supplier, Missouri River Energy Services. These programs can be changed at any time without notice and are available on a first-come, first-served basis. Some projects must be preapproved to qualify for an incentive. Equipment ordered, purchased or installed prior to approval may not qualify.

For additional information or to inquire about rebates, please contact your local municipal utility or email **info@brightenergysolutions.com** or scan the code above with your mobile device.
