

DESIGN REVIEW

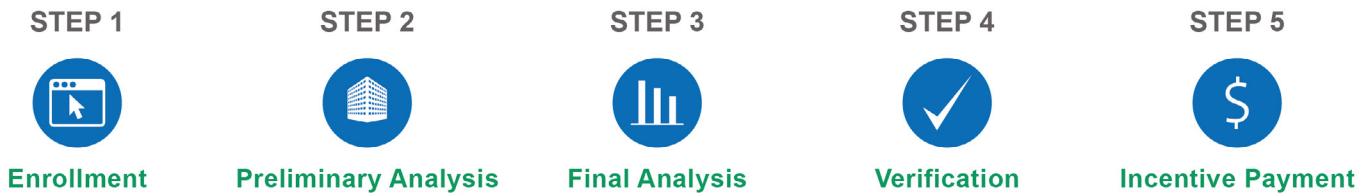

Design Review provides building owners technical and financial support to improve energy efficiency outcomes during new construction project design.

Program Benefits

- Customized energy model — simulating how energy will be used — to help identify cost-effective strategies
- Early design analysis to identify and evaluate strategies to drive deeper energy savings, including:
 - Building envelope
 - Heating, cooling, ventilation
 - Lighting
 - Water heating
 - Equipment
- No-cost consulting throughout the process, from application through verification
- Custom owner incentives:
 - \$350 per average peak kW reduction
 - Gas incentive from participating utilities

How Does Design Review Work?

Eligibility

- + Customer of municipal electric utility participating in Bright Energy Solutions®
- + New construction or change-of-use renovation for buildings 15,000 ft² or larger
- + Early in the design phase and interested in evaluating energy efficiency opportunities

Enrollment Timing

PLANNING AND DESIGN	CONSTRUCTION DOCUMENTS	BIDDING/ ESTIMATING	CONSTRUCTION
Perfect timing	Fewer opportunities available	Too late to enroll in Design Review	

For more information, contact your participating municipal electric utility or visit brightenergysolutions.com.
