

Design Review

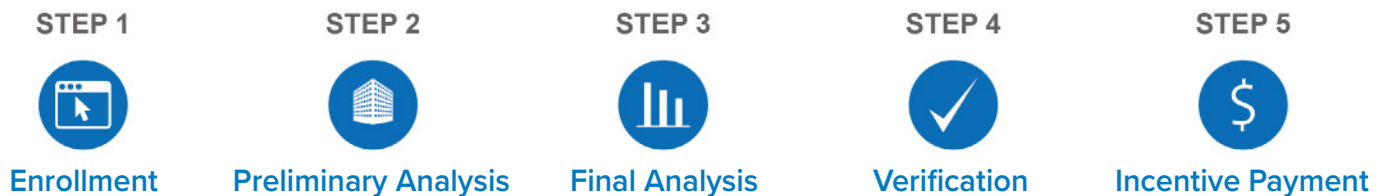

Design Review provides building owners technical and financial support to improve energy efficiency outcomes during new construction project design.

Program Benefits

- ▶ Customized energy model – simulating how energy will be used – to help identify cost-effective strategies
- ▶ Early design analysis to identify and evaluate strategies to drive deeper energy savings, including:
 - Building envelope
 - Food service equipment
 - Heating, cooling and ventilation
 - Lighting
 - Process equipment
 - Refrigeration
 - Water heating
- ▶ No-Cost consulting throughout the process, from application through verification
- ▶ Owner incentives:
 - \$350 per average peak kW reduction
 - Gas incentive from participating utilities

How Does Design Review Work?

How Does Design Review Work?

- ▶ Must be a customer of a municipal electric utility participating in Bright Energy Solutions®
- ▶ New construction or change-of-use renovation for projects to be considered
- ▶ Customer must be willing to evaluate energy efficiency opportunities and be early in the design phase
